POLAR BEAR BIOLOGY, ECOLOGY, BEHAVIOR & CONSERVATION *A Slideshow and Lecture by Jenny E. Ross*

Learn all about polar bears and view spectacular photographs revealing the mysterious lives of these magnificent and fascinating animals. Wildlife photographer and naturalist Jenny Ross recently spent nearly three months in the arctic, where she was able to capture extraordinary images of polar bears while working with renowned scientists who are studying them. She will present more than 140 photographs revealing her encounters with the great white bears, and she will discuss many issues relating to polar bear biology, ecology, behavior and conservation.

Friday, February 3, 2006 from 7:00 to 8:30 p.m. (Q&A to follow)
Bishop Manogue Catholic High School — Student multi-purpose room.

Admission \$7 adults, \$5 children/seniors.

Bishop Manogue students' attendance is made possible by a grant from the **E.L. Weigand Foundation**.
